## ABSTRACT

*Students build the future society. What can help students to build a better society? Good education with some ethics can support students to a greater extent. Is there any good education greater than self-learning? Self-learning helps students to study what they want for themselves and that's the point where students can actually start their career. To choose a career they first need to choose a college which they can fit themselves and have good education... how can they get to know about colleges...?is that necessary for a student to study the terms that are used in graduating colleges? Definitely yes! Because these terms can help students to choose a college for what they are eligible for. With the vast courses that are offered by different universities or colleges students can really get confused in choosing a course that makes them successful. In this kind of confused states, they need a platform where they can get some knowledge about different colleges/universities. This self-learning in choosing a better college can help student to build their career. The main motto of this website is to provide such platform for students to choose a better college.*

## INTRODUCTION

### Problem Definition

Students have been facing a problem since long time about their educational career, like to choose a college of their choice, to what college they are allowed with free seat, what are the specializations available in the college, specialty of the college etc., As there are some platforms which describes about the details of colleges clearly but not clearly. This project basically focuses on the concept to provide clear information about the graduate colleges that are present in a city or state or country.

College websites, Social Networking sites and different platforms play an important role in finding the student views about different colleges. The feedbacks provided by the students help other students to find their educational career as long.

### Background

As Internet has become a part of daily life, website can be used as source of sharing information to the students. Many students who are about to start their graduate career, start their career with a lot of questions like which college to join, for which college they are actually eligible for and so on. So, these questions can be answered when student has some tool with them to know and answer their questions. So, there are websites or applications that provide information of different colleges and universities but many not be updated. Students also try to sort their ranks and try to find different colleges they are actually eligible. So, they need a kind of sorting application to sort their ranks and find different colleges. These can be the important things a student looks for when searching different colleges. After, they try to know different terms that are used and rating of the college.

## Methodology

### Step 1: Data collection from different colleges:

Data is collected from different colleges. The different data is eamcet rank details, placement details and other kinds of information regarding the colleges or universities. This information is used in the website to describe a college of the users.

### Step 2: Developing a website or a desktop application:

A desktop application has been created in order to convey the collected information. So, a user can access information of their requirement by having an account and continue the work. Application helps the users a bit easier because the information search is under the same website.

### Step 3: Sorting Details:

Students can sort their rank based on their rank and category and can directly navigate to a page they want. It helps them a bit easier to handle and remember the information more easily.

### Step 4: Adding Graphs:

Graphs generally play a major role in understanding a large amount of information in a single snapshot. There will be definitely some details that can be easily depicted using graphs. Placements which is a large information can be represented easily using graphs.

## EXISTING SYSTEM

Students actually search for different platforms to post their views about their college and submit their feedback in the platforms. This information can be used by the upcoming students in finding a correct career path and to what they are eligible for. But there are platforms where the details are not updated or sometimes the data is not present. This ambiguity may mislead students in the wrong direction.

This becomes a difficult task for the students to gather data about different colleges and to know for which college they are actually eligible. So, if there are no such platform, students have to search each and every college independently and have to collect the data. There will be a lot of things that students actually don't know about the terms used in graduation colleges. Making them understand such terms helps students to find a better college for themselves. The applications that specify correct information can be used by the students to develop themselves in knowing different terms of graduate colleges.

## PROPOSED SYSTEM

Students have to know the things that actually occur in graduate colleges from fun, education to least important matters. Making a try to make them understand at least some things of the whole concept can help them to study about their career by themselves. They need to study how their career has to be and they need to decide what they want. If they have to study themselves, they need some correct information which may not be available from ambiguous updates. Knowing about colleges and deciding which college they want is students' interest. Such interest can be fulfilled only by correct information. Correct information can be provided by many means. As the internet has become a daily part of every student, this means of sharing information can be useful to hundreds and thousands of students.

So, using this means it is also possible to specify all the details that are helpful for students to select that particular college. Rankings by different departments for graduate colleges also specify the importance of a college. Promising the updated information is a mandatory part of this system. Providing such updated information is the main task of this system.

## SAMPLE SCREENS

### Home.html:

**Description:** The above image describes the home page of the website called "Express2Career". This page consists of the information of some different other pages that are available with the website. The division "Sort Details" contains 2 textboxes and a button to sort details. When details are given in the sort box, then the page to the college or university page to which the details fit for.

### FUTURE SCOPE FOR FURTHER DEVELOPMENT

This application which is developed to help the students of intermediate students can be enhanced with some more activities or permissions. A section called comments can be added for each college so that the students who are pursuing or who pursued their graduation in their college can add a feedback of their views which helps other students to agree or disagree with comments and feedbacks.

One more thing called Live Chat can be added to application to immediately communicate with the users who are facing trouble while using application. The users can be generalized to several users like the students who are pursuing their graduation and the students who have completed their graduation and other students who are pursuing their graduation and other who are upcoming for their graduation so that it will be easy for the upcoming students to know more about colleges.

### CONCLUSION

The application so called **“Express2Career”** is developed is used to help intermediate students who are going to start their graduate career. This website will be helpful because all the students start their career with a lot of questions. With a single website information about different colleges is very much necessary because there we can save
